INTRODUCTION

Bolivia's Salar de Uyuni is one of the most extreme landscapes in the world, a vast desert of salt where the silence is captivating and the stillness almost eerie. Remote and stark yet hauntingly and savagely beautiful, the dazzling white extends to the horizon, dotted with coloured mineral lagoons and geysers. The landscape and the experience of crossing the salt flats are unforgettable.

ITINERARY

SOUTH AMERICA - UYUNI SALT FLATS & LAGOONS

DAY 1: Uyuni Salt Flats

Uyuni, founded in 1889 by Bolivian president Aniceto Arce, is still an important military base. It lies in south-western Bolivia, 3,670 metres above sea level and situated on the edge of the Salar de Uyuni, the largest salt flat in the world. The Salar de Uyuni covers over 10,000 square kilometres of the Bolivian Altiplano and is fringed by the mountains of the Andes. Beneath it lies the world’s largest lithium reserve estimated to be about 100 million tons and accounting for around 70% of the world’s lithium reserves. The salt in the salt flats is over 120 metres deep. The area is remote, arid and cold, stark, yet stunning, boasting extraordinary beauty and a silence that is captivating. Our tour starts with a visit to the cemetery of old trains on the outskirts of Uyuni. Uyuni was an important transportation hub and in the late 19th century, rail lines were built by British engineers and the trains carried minerals to the Pacific Ocean ports. After the collapse of the mining industry in the 1940’s, many trains were abandoned outside Uyuni with the resulting Train Cemetery. The salt winds have led to the corrosion of the metal. We then set off across the Great Salt Flats to Colchani village, where we observe the methods of salt extraction and salt processing. We continue to Incahuasi Island (better known as Fish Island) - an oasis with a unique and isolated ecosystem that features algae and fossils. The area is covered with giant columnar cacti up to 10 metres high, some over 100 years old. Against the backdrop of the salt flats extending to the horizon, this landscape makes for spectacular photos. After a picnic lunch, we travel north to visit the pre-Colombian Pucara de Ayque fort and the nearby chullpares on the foothills of Thunupa volcano. Dinner is included at the hotel tonight.

DAY 2: Colchani to Siloli Desert

This morning after breakfast we begin our overland journey to Soniquera. En route we visit Kañapa Lagoon, a saltwater lagoon surrounded by Caquena, Tapaquillcha and Kañapa volcanoes. We also visit Hedionda Lagoon with its strong smell of sulphur, Chiarkota Lagoon (a freshwater lagoon where diverse fauna can be seen) and Honda Lagoon. Situated in the middle of a low concentration salt flat field, its light blue waters contrast with the earthy colours of the highlands. We have a picnic lunch and travel through the Siloli Desert, one of the driest deserts in the world, with its bizarre rock formations caused by wind erosion. Dinner is included at the hotel tonight.

DAY 3: Siloli Desert - Coloured Lagoons (REA) - Uyuni

We make an early departure this morning to explore the Eduardo Avaroa Andean Fauna National Reserve (REA). Covering an area of over 700,000 hectares, the reserve features salt pans, volcanoes, snow-capped peaks, thermal springs and geothermal geysers and is home to unique species of fauna that have adapted to the extreme conditions of the region. We visit Laguna Colorado (4,278 metres), declared a RAMSAR site due to the 30,000 Andean flamingos that nest here. Laguna Colorado is characterised by the red colour of its water and it is the most important flamingo site in the region. You may also see vicuñas, llamas and vizcachas. We have a picnic lunch and continue on to the Sol de Mañana geysers with their active fumaroles and volcanic craters. The crater bottoms display boiling lava and the fumaroles emit spouts of mixed water and superheated steam that reach heights of 80 to 100 metres. We visit "Laguna Verde", a beautiful green lagoon at the foothills of the Licancabur volcano (5,865 metres), where flamingos are often seen, before continuing north to Uyuni. Uyuni, founded in 1889 by Bolivian president Aniceto Arce, is still an important military base. It lies in south-western Bolivia, 3,670 metres above sea level and situated on the edge of the Salar de Uyuni, the largest salt flat in the world. The Salar de Uyuni covers over 10,000 square kilometres of the Bolivian Altiplano and is fringed by the mountains of the Andes. Beneath it lies the world's largest lithium reserve estimated to be about 100 million tons and accounting for around 70% of the world's lithium reserves. The salt in the salt flats is over 120 metres deep. The area is remote, arid and cold, stark, yet stunning, boasting extraordinary beauty and a silence that is captivating. Dinner is included at the hotel.

SUSTAINABILITY

Being environmentally accountable is a crucial part of our organisation. Chimu is currently striving towards using less paper, taking several initiatives to do so and tracking our progress along the way. Our goal: A paperless organisation. For this reason, all information given to you will be sent electronically. We encourage those who choose to travel with us to support our aspirations and actions and ask that you reconsider printing out documentation. To view these documents, you can download them to your iPad or portable computer before and during your trip.

Chimu is passionate and dedicated to sustainability measures and understands the crucial part sustainability plays within the tourism industry.

We use local guides and office staff to both maximise local employment opportunities and minimise carbon footprint. Local guides also ensure you benefit from the intimate knowledge, passion and culture of the country you're visiting. Our guides are all highly qualified (most with university degrees) or equip with many years of experience and are paid above the standard wage. Whether it be our knowledgeable local guides, locally

SOUTH AMERICA - UYUNI SALT FLATS & LAGOONS

produced meals or the transport on tour, we do not use imported goods when local products are available. We aim to minimise our impact on the environment and give as much back as possible to the communities we work in.

While visiting the many national parks, heritage sites, museums and landmarks our travellers are encouraged to explore remain culturally aware and sensitive. We further encourage you to buy appropriate souvenirs and discourage the buying of anything wrongfully made or taken from the environment i.e. shells and endangered species products. Information on how you can be environmentally conscious, and travel responsibly will be made available in our Travellers Guides and provided during your travels by guides and staff.
