

THE ARCTIC - SVALBARD: LAST STOP BEFORE THE NORTH POLE | OCEAN ATLANTIC

INTRODUCTION

Discounts of 20-30% available for new bookings until 30 Jun 2022!*

Enjoy the immense beauty of Svalbard, where the Arctic sea ice reaches down to the Norwegian archipelago, north of the mainland of Norway. This Arctic adventure offers wildlife sighting possibilities such as whales, walruses, polar bears, polar fox, reindeer, and millions of sea birds with the backdrop of stunning fjords and glaciers. Experience high summer in the Arctic with Ocean Atlantic - one of the few ice-class expedition ships built to withstand the North Pole's pack ice.

Note: Return flights are included from Oslo to Longyearbyen

**Discounts of 20% available on cabin categories G, F, E, and discounts of 30% available on cabin categories D, C, B, A, Premium Suite. Discounts are subjects to availability and prices are subject to change due to the exchange rate. Discounts are on sale until 30 June 2022 unless sold out or removed prior. Deposit must be paid to Chimu by 29 June 2022 to ensure we can secure the discount. Discount amount is per stateroom and not combinable with other promotions. Valid on selected dates and departures only. Please contact us for full details and current availability.*

THE ARCTIC - SVALBARD: LAST STOP BEFORE THE NORTH POLE | OCEAN ATLANTIC

DAY 1: Embarkation in Longyearbyen

Arrival to Longyearbyen, Capital of Svalbard – possibly the northernmost ‘real’ town in the world. Our vessel, Ocean Atlantic, is docked close to the town center. After boarding and a welcome drink, the Expedition Leader will provide information about the voyage, the ship's daily routines and the various security and safety procedures. Before sailing, there will be a mandatory safety drill. The Captain then takes the ship out of Advent Fjord and our Arctic adventure commences.

DAY 2: Regnardneset and Lilliehook Glacier

During the ‘night’ (what is night, when the sun never sets?), we have passed Prins Karls Forland and have arrived in the magnificent Krossfjord. Our visit to Svalbard is in the middle of the arctic summer and at this time of year the migrating birds are very active. The months of June and July offers the best chances of spotting exotic and fantastic birds. We plan on making a landing during the morning at Mollerhamna or in another suitable location. The majestic landscape around Regnardneset in the innermost area of Krossfjorden give us our first taste of what has enticed the early explorers of these lands in the far north. In the afternoon, we continue further north into the fjord system, and depending on the ice situation, we may do a Zodiac cruise along the Lilliehook Glacier front... or enjoy a lecture.

DAY 3: Smeerenburg and Ytre Norskoya

We have now entered North West Svalbard, which was declared a national park in 1973. The day could begin with a Zodiac cruise in Danskerfjorden, looking for seals in Virgohamna, before crossing from Danskøya to Amsterdamøya to make a landing at Smeerenburg, the legendary whaling town of 17th century. 200-plus men were living – and quite often dying – here in the heyday of blubber production. There are several interesting places to visit in this northwestern corner of Spitsbergen. If conditions allow we'll make a landing on Ytre Norskoya, where whalers would have their lookout posts.

DAY 4: Alkafjellet and Torrelnesset

In the morning we arrive and cruise slowly by the famous Alkefjellet. If the weather is on “our side” we will have a good view of the steep cliffs. The whole area is home to a dense congregation of Brünichs guillemots. There is so many of the birds, that hardly an inch is free. During the summer the breeding pairs offer a wild view of frantic activity, both along the cliffs and in the sea in front. More wildlife awaits us as we land at the polar desert landscapes of Torrelnesset. The beach here is home to a host of walrus that lay amongst each other. They feed on the clams and any other molluscs that they can find in the shallows of Svalbard’s waters.

DAY 5: Monaco Glacier and Texas Bar

During the night we head to Wood Fjord and its branch, the Liefde Fjord. Our plan is to embark on a Zodiac cruise along the broad glacier front of Monacobreen. This gives a unique insight of the glacial forces and the unlimited forms of icebergs. The ice front is named after Albert I of Monaco, who was a major sponsor of Svalbard research. Many trappers historically hunted and trapped in these areas. Some of them stayed over the winter and built cabins. The cabin known as Texas Bar is said to be named after the US state of Texas. This cabin was built in 1927. We plan to visit the area around the cabin and enjoy the scenery that surrounds us.

DAY 6: Ny Alesund and Ny London

Today we enter the beautiful Kongs Fjord known for the former mining settlement and simply being one of the most amazing fjord areas in all of Svalbard. Our first landing will be at Ny Ålesund. This settlement is in fact further north than Longyearbyen, making it THE northernmost town. But... is a group of scientific stations, a post office and a single shop open for a few hours a real town? You will have to judge for yourself. The setting is nice, the scientific projects are very interesting, and so is the town history. The Captain will try to get alongside, so we can enjoy an easy walk through the area. On the opposite side of the fjord we find the abandoned marble mining settlement Ny London. Its history is short but hectic, as the marble deposits allowed for an almost Klondike like rush to mine the resources. Wars and failing financial viability ended the adventure only 9 years after it started. We take a walk amongst the ruins of workshops, locomotives and cranes, testament to the great but failed investments. After the visit, we are southbound towards the entrance to the Isfjord. On our way towards Longyearbyen, we hope to get our last glimpses of wildlife as well as the truly unique landscapes of Svalbard.

DAY 8: Disembarkation in Longyearbyen

Early in the morning the ship has returned to our starting point in Longyearbyen. After breakfast and farewell greetings to the expedition team and crew, disembarkation will take place. Transfer is arranged to the airport. Please note that all the outings and landings rely on weather, sea and ice conditions being favorable both for the ship to access the areas, as for the zodiacs and kayaks to maneuver under adequate conditions, ensuring the safety of all our passengers and staff. For this reason, during moments of harsh weather and throughout the entire trip, Ocean Atlantic has excellent public areas, such as wellness/sauna, restaurant, bar and a library for our passengers to spend their spare time. Our ship is staffed by experts in the field who will also share great lectures along the way, ranging from exploration history to biology, geology, ice and wildlife.
