

NORTHWEST PASSAGE: CALGARY TO TORONTO | GREG MORTIMER

INTRODUCTION

BOOK AND SAVE: Book by 30 September to save up to 10% off select cabins and departures*

Get a glimpse into a world of icy and labyrinthine channels of Canada's High Arctic. Departing from Calgary, a compelling adventure awaits as you experience archipelagos and channels teeming with wildlife and remote indigenous communities. Encounter unique wildlife such as walrus, beluga whale and elusive animals such as the beluga and polar bear. Hike on Devon Island, one of the worlds largest uninhabited islands, visit the graves of famous explorers on Beechey Island. This a truly surreal expedition experience.

ITINERARY

DAY 1: Arrival in Calgary

Upon check-in at Delta Hotel Calgary Airport, reception staff will provide you with Aurora Expeditions cabin tags. Please fill out the luggage tags clearly, showing your name and cabin number to allow us to deliver your luggage to your cabin. At our voyage briefing, enjoy a welcome drink and meet fellow expeditioners, before spending the night in preparation for your charter flight to Cambridge Bay.

DAY 2: Fly Calgary to Cambridge Bay and Embark

Board our charter flight to Cambridge Bay, a hub of the Canadian Arctic, and transfer to the harbour, where Zodiacs shuttle you aboard for embarkation. After boarding, there’s time to settle into your cabin before our important safety briefings. This evening meet your expedition team and crew at the Captain’s Welcome Dinner.

DAY 3: Expedition Cruising - Day 3 to 6

In true expeditionary style, our itinerary for the following days is entirely dependent on unpredictable sea ice. The following are places we hope to visit: King William Island In 1859, a Franklin expedition tent camp was discovered at Cape Felix. Remains attributed to the Franklin expedition have been found at 35 different locations on King William Island and on nearby Adelaide Peninsula. South of Cape Felix, in Victoria Strait, we hope to visit Victory Point and get close to where the HMS Erebus and HMS Terror were abandoned in 1848. Coningham Bay Across from Victoria Strait, Coningham Bay lies on the shores of Prince of Wales Island. This is a polar bear hotspot where the majestic creatures come to feast on beluga whales that are often trapped in the rocky shallows at the entrance to the bay. It is not unusual to find the shoreline littered with whale skeletons - and very healthy-looking polar bears! Prince Regent Inlet, Fort Ross Sailing down the east coast of Somerset Island, you might spot beluga whales and narwhals as they feed on the large numbers of arctic char that enter Creswell Bay in late summer. An important bird area, the bay also attracts such species as black-bellied plovers, king eiders and white-rumped sandpipers. At Fort Ross, see an abandoned Hudson's Bay Company trading outpost founded in 1937, which closed in 1949 because supply ships could not get through the thick sea ice. Enjoy guided walks on the tundra. Prince Leopold Island, Port Leopold On the southern side of Lancaster Sound opposite Beechey Island lie the towering bird cliffs of Prince Leopold Island— the most important bird sanctuary in the Canadian Arctic, with approximately 500,000 birds nesting pairs here in summer. Ringed seals are often spotted on the sea ice. Nearby Port Leopold is a historic site where British explorer James Clark Ross wintered in 1848 while searching for the missing Franklin expedition. The ruin of a century old Hudson's Bay trading post can be found there, and polar bear often lurk nearby. The shallow gravel beds attract beluga whales, which come to moult in this part of the Arctic each summer.

NORTHWEST PASSAGE: CALGARY TO TORONTO | GREG MORTIMER

DAY 7: Beechy Island, Lancaster Sound

At the western end of Devon Island lies Beechy Island. Named after Frederick William Beechey, the island has many of Canada's most important Arctic relics and is a designated Canadian National Historic Site. Sir John Franklin's first winter, 1845-46, was spent here during his attempted to sail through the Northwest Passage aboard HMS Erebus and HMS Terror, with perilous results - the first three of his men died here. Roald Amundsen landed at Beechy Island in 1903, during the first successful voyage to fully transit the Northwest Passage from the Atlantic Ocean to the Pacific Ocean.

DAY 8: Devon Island, Lancaster Sound

At a latitude almost 75° degrees north, we are now truly in the High Arctic. Here, nutrient-rich waters support an abundance of wildlife, giving the area the moniker 'wildlife super highway' of the Arctic. Devon Island is the largest uninhabited island on Earth and features stunning geology, with flat-topped mountains and glacial valleys giving Devon Island its unique character. We may explore Croker Bay or Maxwell Bay, both offering great opportunities for Zodiac cruising. Dundas Harbour offers walks on undulating tundra and the area is great for birdwatching. A dilapidated Royal Canadian Mounted Police outpost and remnants of a former Hudson's Bay Company trading post and ancient semi-subterranean Thule dwellings can be found here. In the bay, walrus are often present.

DAY 9: Pond Inlet, Bylot Island

The picturesque hamlet of Pond Inlet, overlooking Eclipse Sound, is surrounded by scenic mountain ranges and numerous glaciers and fjords. Travellers come to marvel at the abundant wildlife hoping to see narwhals, beluga and orca whales, ringed and harp seals, caribou and the occasional polar bear. Explore churches and visit the Natinnak Center to see exhibits showing the culture and history of the local Inuit people. Husky dog pens are near the landing beach. In the afternoon, we sail along the coast of nearby Bylot Island. Covered with mountains, icefields, steep cliffs, snowfields and glaciers, Bylot Island provides nesting habitat for large numbers of thick-billed murres and black-legged kittiwakes. A total of 74 distinct species of Arctic birds thrive on this island. Due to the richness of the wildlife with the beauty and diversity of the landscapes in the area, a large portion of the island was also included in the Sirmilik National Park, established in 2001.

DAY 10: Sillem Island

Sail around Sillem Island, with glacial features on all sides. A slow cruise offers the chance to see many glaciers, discharging cascades as well as a variety of seals and other arctic wildlife. Farther south along the east coast of Baffin Island lies Isabella Bay, an important summer and autumn feeding ground for a large population of bowhead whales. Stacked side-by-side, numerous soaring cliffs of Sam Ford Fjord make for a majestic site as you sail by. One of the most isolated places on the planet, this big-wall playground attracts climbers eager to scale the sheer rock faces that seem to shoot straight out from the sea.

DAY 11: Isabella Bay

After a morning at sea and farther south along the east coast of Baffin Island, we reach Isabella Bay, an important summer and autumn feeding ground for a large population of bowhead whales.

NORTHWEST PASSAGE: CALGARY TO TORONTO | GREG MORTIMER

DAY 12: Baffin Island, At Sea

Explore the coast of Baffin Island farther south before crossing Baffin Bay to Greenland, when we may encounter Greenland’s famous icebergs. Keep watch for humpback, sei, sperm and fin whales, as well as various species of seals such as ring and harp seal. Our team of experts entertain us with informative talks about wildlife, geology and epic tales of early explorers such as Franklin and Amundsen.

DAY 13: Disko Island

This compelling island seems to have more in common with Iceland than Greenland. While most of the interior is mountainous and glaciated, its beautiful shorelines boast black sandy beaches, unusual basalt columns, hot springs and dramatic lava formations. On a guided hike, enjoy a diversity of Arctic flora. Zodiac cruise in Disko Bay, a hotspot for marine life including humpback, fin, minke and bowhead whales. The small friendly village has a fascinating historical museum.

DAY 14: Ilulissat

Known as the ‘birthplace of icebergs’, this region produces some of the most dazzling icebergs found anywhere in the Arctic. Hike past the husky sledge dogs to the UNESCO World Heritage-listed Icefjord and stand in awe of its immensity. Sermeq Kujalleq, also known as Jakobshavn Glacier, is the most productive glacier – not only in Greenland but the entire Northern Hemisphere. It produces 20 million tonnes of ice each day, all floating into the Ilulissat Icefjord and Disko Bay. Conditions permitting, enjoy a Zodiac cruise at the mouth of the fjord and kayak through sea ice and icebergs. An optional 90-minute helicopter flight over the icefjord is a truly once-in-a-lifetime experience.

DAY 15: Eternity Fjord

Evighedsfjorden, or Eternity Fjord, is one of the more spectacular fjord complexes in west Greenland due to its forested landscape. Hike through a forested valley, witness hills become towering snow-capped mountains as countless glaciers flow, and streams pour down from sheer cliff walls. Occasionally, the thunderous sound of a calving glacier breaks the silence in a place where you are unlikely to see another soul.

DAY 16: Fly Kangerlussuaq to Toronto

After an overnight sailing along Sondre Stromfjord we arrive in Kangerlussuaq, where we disembark. Farewell the crew and expedition team, and transfer to the airport for our charter flight to Toronto. Spend the night at Westin Toronto Airport Hotel.

DAY 16: Generic

DAY 17: Depart Toronto

Check out of your room and continue your journey. Important note: In the spirit of expedition travel, we encourage exploration and adventure offering flexibility in challenging environments. This itinerary is only a guide and is subject to change due to weather, sea, pack-ice and other conditions beyond our control.
