

SUBANTARCTIC ISLANDS OF NEW ZEALAND

INTRODUCTION

This 15-day Expedition gives you access to 2 of New Zealand's three world heritage sites onboard a luxury, small ship expedition vessel. Using Zodiacs to access remote parts of Milford Sound, Dusky Sound and Doubtful Sound, get up and close to waterfalls towering over 150 metres tall as dolphins can be easily sighted in one of the world's most spectacular fjords.

From the Fjordlands, venture south to Australia and New Zealand's remote Subantarctic Islands where Albatross, Penguins and Seals are in abundance. The jaw dropping beautiful scenery you will experience from Le Soleal, matched with cuisine, service and expedition crew will be an experience of a lifetime, unlike anywhere else on Earth. Often described as the 'Galapagos of the Southern Ocean', the Subantarctic Islands are some of the most well protected natural environments on the planet. A journey to this surreal location is one both greatly enriching and gives you a true understanding of protecting these unique and unforgettable spaces - some of the last on Earth.

This voyage will be undertaken in partnership with National Geographic. A national Geographic photographer & expert will accompany your voyage to provide their expertise & knowledge.

SUBANTARCTIC ISLANDS OF NEW ZEALAND

DAY 1: Embarkation in Dunedin

Dunedin is New Zealand's oldest city and is often referred to as the Edinburgh of New Zealand. This city of the south, wears its Scottish heritage with pride. The city contains some of the best preserved Victorian and Edwardian architecture in the Southern Hemisphere. The Silverpeaks hinterland to the North West provides a picturesque backdrop and The Otago Peninsula, which lies within the city boundaries, has internationally renowned wildlife reserves, including the only mainland breeding colony of Northern Royal Albatross.

DAY 2: Ulva Island

Ulva Island (Te Wharawhara) is the largest of 20 islands within Paterson Inlet, Stewart Island, with an area of approx. 270 hectares. The island has never been logged and was declared pest free in 1997, becoming one of the few predator-free sanctuaries in New Zealand. The island is now a haven for many species of birds and plants that are rare, or have died out, on the mainland of New Zealand. Bird species regularly encountered include: the flightless Stewart Island Weka, South Island saddleback, yellowhead and Stewart Island robin. Ulva Island is not only a bird enthusiast's paradise, it is also one of the few offshore islands with a largely undisturbed podocarp forest. Well-maintained tracks offer easy walking for most people providing a unique opportunity to see rare birds and plants at close quarters in a safe environment.

DAY 3: Dusky and Doubtful Sound

Dusky Sound is one of the most isolated fjords in Fiordland National Park. This huge, protected natural zone situated in the south-west quarter of New Zealand's South Island is listed as UNESCO World Heritage. The sheer cliffs, waterfalls, shimmering lakes and primitive forests here are each more beautiful than the next. These spectacular landscapes sculpted by successive glaciations are a source of endless wonder. In 1773, the British navigator James Cook spent a few weeks at Dusky Sound, as demonstrated by a plaque that can be seen at Astronomer's Point. During your sailing, observe the richness of the local wildlife: cormorants, seagulls, New Zealand fur seals, but also Fiordland crested penguins, a rare and endemic species. Weather and time permitting you may explore the Sound from our fleet of Zodiac®. Referred to as the "Sound of Silence", there is a secluded serenity that surrounds Doubtful Sound in contrast with the better-known Milford Sound. Both are part of the Fiordland National Park, a UNESCO World Heritage Site. Lieutenant James Cook named 'Doubtful Harbour' in 1770 as he was uncertain if it was navigable under sail. Doubtful Sound is the deepest of the fiords with a maximum depth of 421 m. It contains three distinct 'arms' and several outstanding waterfalls in the area from Deep Cove to the open ocean. Your ship will spend time navigating around Secretary Island through both Thompson and Doubtful Sounds. You will enjoy the spectacular scenery from the outer decks.

DAY 4: Milford Sound

Milford Sound fiord is among one of the most beautiful natural sites in New Zealand. So much beauty will quite simply take your breath away. Located on the south-west coast of South Island, in the Fiordland National Park, this sumptuous inlet carved out by glaciers advances over at least 15 kilometres inland, in the Southern Alps. Majestic cliffs seem to surge out of the dark waters, rising several hundred metres high: an abrupt relief from where impressive waterfalls cascade.

DAY 5: The Snares

Amongst the Subantarctic Islands of New Zealand, the Snares have the distinction of being the only forested group without introduced mammals, not even mice. Consequently, it is a remarkable haven for wildlife. The island boasts more nesting seabirds than the entire realm of the British Isles. Over 2 million Sooty Shearwaters breed here in the summer months. Four species of Albatross are listed as breeding on the Snares along with 35,000 endemic Snares crested penguins. There are also approximately 1,000 New Zealand fur seals and 500 New Zealand sea lions. Landing on the Snares is prohibited. If time and weather permit, you will have the opportunity to explore the coastal environments and view the prolific wildlife from our fleet of Zodiac.

DAY 6: Enderby Island and Musgrave Inlet

Enderby Island is situated off the North Eastern tip of Auckland Island and is the second largest Island in the group. The eradication of introduced species in 1994 has seen a significant increase in the abundance of the native flora and fauna compared to the main Auckland Island. It has become a stronghold for the rare yellow-eyed penguin and the primary breeding location of the New Zealand Sea Lion. You will head ashore and have the opportunity to undertake a guided walk on the Northern Cliffs track as well as spend time viewing the New Zealand Sea Lion colony. There is also the opportunity to undertake a zodiac tour around the coastline of Enderby Island in search of the Auckland Island Teal and other endemic species.

SUBANTARCTIC ISLANDS OF NEW ZEALAND

DAY 7: At Sea

During your day at sea, make the most of the many services and activities on board. Treat yourself to a moment of relaxation in the spa or stay in shape in the fitness centre. Depending on the season, let yourself be tempted by the swimming pool or a spot of sunbathing. This day without a port of call will also be an opportunity to enjoy the conferences or shows proposed on board, to do some shopping in the boutique or to meet the PONANT photographers in their dedicated space. As for lovers of the open sea, they will be able to visit the ship’s upper deck to admire the spectacle of the waves and perhaps be lucky enough to observe marine species. A truly enchanted interlude, combining comfort, rest and entertainment.

DAY 8: Sandy Bay, Macquarie Island

Macquarie Island, or “Macca” as it is colloquially known, was inscribed on the UNESCO World Heritage List in 1997 as a site of major geoconservation significance, being the only island in the world composed entirely of oceanic crust and rocks from the mantle. It is an island of unique natural diversity and one of the truly remarkable places on earth. Sandy Bay is located on the East Coast of the Island and is home to significant Royal and King Penguin rookeries as well as a breeding colony of Southern Elephant Seals. You will have the opportunity to land ashore in Sandy Bay to view both the King and Royal colonies as well as the other prolific wildlife in the Bay.

DAY 9: Anare Station

Long celebrated as one of the wonder spots of the world, the Macquarie Island is an island of great beauty and outstanding natural diversity, a breeding place for more than 3.5 million seabirds, most of which are penguins. There are four species breeding on Macquarie Island; Royals, Kings, Gentoos and Rock Hoppers. There are also three types of fur seals and one seventh of the world's population of elephant seals breeding on the Island. In 1948 The Australian National Antarctic Research Expeditions (ANARE) established its expedition headquarters on Macquarie Island. You will have the opportunity to undertake a guided walk around the ANARE Station to view the facility and the prolific wildlife that resides here.

DAY 10: At Sea

During your day at sea, make the most of the many services and activities on board. Treat yourself to a moment of relaxation in the spa or stay in shape in the fitness centre. Depending on the season, let yourself be tempted by the swimming pool or a spot of sunbathing. DAY 11: Campbell Island

Campbell Island is the most southerly of the five New Zealand subantarctic groups. Described by the English botanist Joseph Hooker as having a 'flora display second to none outside the tropics.' It is known for its megaherbs, herbaceous, perennial wildflowers characterised by their great size, with huge leaves and very colourful flowers, which have developed as an adaptation to the harsh weather conditions on the islands. Campbell Island is also home to six species of albatross, and several critically endangered endemic birds including the Campbell Island teal and snipe. You will have the opportunity to undertake a guided walk on the Col Lyell Saddle boardwalk as well as undertake a zodiac tour around the coastline of Perseverance Harbour.

DAY 12: At Sea

The following day will be spent at sea toward the Antipode Islands.

DAY 13: Antipodes Islands

The volcanic islands of the Antipodes Island group lie 860 km to the southeast of New. The group belongs to the New Zealand's Subantarctic Islands and consists of one main island, Antipodes Island, Bollons Island to the north, and numerous small islets and stacks. The islands are home to a wide variety of sea and land bird species including two species of parakeet. The seabirds range from the tiny storm petrel to the Antipodean wandering albatross, one of the largest flying birds in the world. There are also significant populations of erect-crested and rock hopper penguins. Landing on the Antipodes is prohibited. If time and weather permit, you will have the opportunity to explore the coastal environments and view the prolific wildlife from our fleet of zodiacs.

SUSTAINABILITY

Being environmentally accountable is a crucial part of our organisation. Chimu is currently striving towards using less paper, taking several initiatives to do so and tracking our progress along the way. Our goal: A paperless organisation. For this reason, all information given to you will be sent electronically. We encourage those who choose to travel with us to support our aspirations and actions and ask that you reconsider printing out documentation. To view these documents, you can download them to your iPad or portable computer before and during your trip.

Chimu is passionate and dedicated to sustainability measures and understands the crucial part sustainability plays within the tourism industry.

We use local guides and office staff to both maximise local employment opportunities and minimise carbon footprint. Local guides also ensure you benefit from the intimate knowledge, passion and culture of the country you're visiting. Our guides are all highly qualified (most with university degrees) or equip with many years of experience and are paid above the standard wage. Whether it be our knowledgeable local guides, locally produced meals or the transport on tour, we do not use imported goods when local products are available. We aim to minimise our impact on the environment and give as much back as possible to the communities we work in.

While visiting the many national parks, heritage sites, museums and landmarks our travellers are encouraged to explore whilst remaining culturally aware and sensitive. We further encourage you to buy appropriate souvenirs and discourage the buying of anything wrongfully made or taken from the environment i.e. shells and endangered species products. Information on how you can be environmentally conscious, and travel responsibly will be made available in our Travellers Guides and provided during your travels by guides and staff.

For more information on our sustainability policies, including how we are striving towards being a paperless organisation, click [HERE](#)
