

## INTRODUCTION

Spend 8 days soaking up the sun in the Galapagos Islands. You will sail onboard the 16 passenger, luxurious ship - Elite. Enjoy a range of activities such as stand up paddle boarding, kayaking, snorkelling and panga rides and 2 landings a day (subject to government approval and weather conditions\*)

The Galapagos is a wildlife enthusiasts dream. Exploring the Eastern and Western Islands will allow you to see a variety of topography and a mix of flora and fauna. See a wide range of birds, giant tortoises, turtles, sea lions and perhaps even sharks or whales. You will visit Sierra Negra, one of the most active volcanoes in the Galapagos and head up to see the huge caldera. You'll also head to a giant tortoise breeding centre, which plays an important part in conservation of these fascinating and endemic creatures.

**Combine your Galapagos cruise on the Elite with a stay at the premium [La Selva Lodge](#) in the Amazon for an exclusive saving. [Contact us](#) for more information and pricing!**

Check out the other itineraries onboard the Elite: [5 Day Central Islands](#), [4 Day South Eastern Islands](#)

## ITINERARY

### TRIP CODE

ECGGEWA

### DEPARTURE

Selected Saturdays

### DURATION

8 Days

### LOCATIONS

Galapagos, Ecuador

## ECUADOR - EASTERN & WESTERN ISLANDS | ELITE

### DAY 1: Arrive in San Cristobal & El Junco Lagoon

AM: Arrive at San Cristobal airport where you will be transferred to the vessel. PM: El Junco Lagoon Walk up the rocky path surrounded by rich vegetation and wildlife to the rim of the El Junco Lagoon, an impressive crater lake located in the highlands of San Cristobal island. Here you will enjoy superb panoramic views of the island, and you can often catch frigate birds diving and bathing in the crystal clear water below.

### DAY 2: North Seymour Island & Dragon Hill

AM: North Seymour North Seymour island is a small island named after Lord Hugh Seymour, a senior British Royal Navy officer. Walking amongst the low, bushy vegetation you will be able to observe a large variety of birds, including blue-footed boobies, swallow tailed gulls and a large population of frigate birds. Look out for the marvellous bright red chests of the male frigates used to attract a mate. PM: Santa Cruz Dragon Hill The name Dragon Hill refers to the large population of Galapagos land iguanas that have made their home here. As you walk along the rocky coastline and through the forests of cacti and Palo Santo trees, you will no doubt encounter a number of these incredible creatures that resemble miniature dragons. The high tide also makes this a fantastic place to snorkel as the coral attracts a plethora of colourful fish close to the shoreline.

### DAY 3: Sierra Negra & Breeding Centre Visit

AM: Sierra Negra Volcano The Sierra Negra is one of the most active volcanoes in the Galapagos and has the second largest caldera in the world. As you walk up to the top of the caldera you will encounter forests of guava trees and on a clear day you will be treated to spectacular views of the other five volcanoes on the island. PM: Arnaldo Tupiza Breeding Center The Arnaldo Tupiza Breeding Center, where two species of giant tortoise are bred to increase the population of these incredible animals, plays an essential role in protecting the future of the Galapagos. As you walk around the centre you will also be able to enjoy the beautiful gardens that boast of a wide variety of native plants.

### DAY 4: Moreno Point & Urbina Bay

AM: Moreno Point Punta Moreno is an excellent site for fans of geology and bird lovers. The ground is covered in rough lava, dried out after an eruption decades ago. The formations of the lava rock indicate how it flowed and dried and are very interesting for geologists. The lava flow cooled unevenly, and in places there are little ponds of brackish water popular with wading birds like flamingoes, herons and stilts. You may even get to see the occasional Pintail Duck in one of the pools! There is little in the way of vegetation, but some hardy pioneer plant species and cacti have begun the process of breaking the lava rocks down into something friendlier for plants and animals. There are small lizards and snakes to be found in and among the rocks. Along the coastline, tidal pools may trap some interesting sea life, and you may get to see some marine iguanas swimming and diving down to feed on underwater algae. Also snorkeling along the shoreline, lucky guests may spot some Galapagos Penguins. PM: Bachas Beach, Santa Cruz Bachas is one of the more beautiful beaches in the entire Galapagos archipelago - and that's really saying something. It is a long stretch of pristine white sand where sea lions lounge and crabs scuttle back and forth. It was used by the Americans during World War Two: "Bachas" is actually a play on the word "barges," which were once landed here. Sea turtles nest in some of the sand dunes here, and your guides will ask you to stay clear of the marked areas so as not to disturb their eggs. A short distance away are two saltwater ponds where flamingos are frequently seen. There is no real hike here: only the warm sandy beach. After a stroll along the sand and a refreshing dip, some of our guests like to do some easy snorkeling in the gentle surf.

### DAY 5: Espinosa Point & Vicente Roca Point

AM: Espinosa Point, Fernandina Years after your trip, many of your favorite photos will have been taken here on Espinosa Point. Hundreds of marine iguanas bask in the sun near the landing point: sharp-eyed guests may even spot some swimming in the surf, ready to dive down and gnaw some algae off of the rocks offshore. Galapagos hawks soar overhead, looking for a meal, or stare, stony-eyed, at visitors from their perch in a tree. At the end of one of the trails, flightless cormorants – a species unique to the islands – make their nests and clumsily waddle around. In the gentle surf off the point, monstrously large sea turtles surface, gulp a mouthful of air, and sink again. Some visitors will spot the shy Galapagos snakes slithering between the cracked lava rocks. Tidal pools have been known to capture large stingrays, which then must await the next tide to escape to the sea again. Geology buffs will marvel at the lava formations which make up the rugged ground here. Unforgettable! PM: Vicente Roca Point, Isabela Vicente Roca Point, on the rocky coast of Isabela Island, is not a walking tour. The visitor site is the coastline itself: rocky and pounded by the surf. Pangas keep a safe distance from the treacherous waves, making their way along the coastline. Visitors can expect to see both varieties of sea lions native to the Galapagos: the Galapagos Sea Lion and the Fur Sea Lion. Also, lucky guests may see penguins along the rocky shore and any number of sea birds nesting along the cliffs and soaring overhead. The snorkeling is excellent here: the guides will pick the best spot depending on the conditions, and guests have the possibility of seeing sea lions, penguins and turtles in addition the usual parrot fish, surgeon fish, sergeant-majors and other stars of the pacific reefs.

### DAY 6: Rabida Island & Bartholomew Island

AM: Rabida island is most known for its dark red sand beach surrounded by a backdrop of cliffs and steep volcanic hills full of Palo Santo trees and endemic cacti. A panga ride around the shoreline gives the chance to spot blue-footed and nazca boobies and water activities such as snorkelling, kayaking or paddle boarding are ideal for seeing white tipped sharks and rays. On the beach you will find a large noisy colony of sea lions and the surrounding salt brush is home to a nesting colony of pelicans. Inland, bird watchers will delight in seeing mockingbirds, yellow warblers and Darwin finches - Rabida is the only site where all nine Darwin's finches are found.

PM: Bartholomew Island Bartholomew island is an islet located in Sullivan Bay and its most famous landmark is a huge volcanic cone named Pinnacle Rock. A walking trail leads up to a viewpoint at the summit of the island where you can enjoy spectacular views of Pinnacle Rock and the surrounding lava flows. The northern beach, a nesting site for green sea turtles, is perfect for snorkelling where sightings of spotted eagle rays, penguins and reef sharks are possible.

### DAY 7: Kicker Rock, Witch Hill & Tortoise Reserve

AM: San Cristobal - Kicker Rock & Witch Hill  
 Kicker Rock, is an iconic feature of the Galapagos that has been formed over time by the erosion of the cone of an extinct volcano. In addition, on the rock formation itself, blue-footed boobies, frigatebirds and sea lions can often be seen perched on the ledges above which makes an excellent site to take great pictures while the vessel circumnavigate the rock formation. Witch Hill features an idyllic white sand beach which can be accessed by dinghy and is a superb vantage point for seeing Kicker Rock in the south of the island. The hill itself is an eroded tuff cone and the calm waters at the base of it offer a magnificent spot for snorkeling. Meanwhile, a walk along the beach or on one of the inland paths, provides opportunities to see a variety of shore birds, finches and mockingbirds. PM: Giant Tortoise Reserve The visit to the Giant Tortoise's Reserve is the longest hike on San Cristobal; the walk is about 5 km one way and may be quite hot. This is an excellent site for observing giant tortoises in their natural habitat. San Cristobal has a population of six thousand giant tortoises; in a good day, hundreds of them can be seen along with other endemic species, such as lava lizards, and mockingbirds. Snorkel is a great activity as you have opportunities to see sea turtles and tintoreras (white tipped reef sharks). The beach of this visitor site is a nesting area for sea turtles.

### DAY 8: San Cristobal Interpretation Center & Depart

AM: San Cristobal Interpretation Center A short distance from the centre of San Cristobal is the San Cristobal Interpretation Center, which provides an overview of the fascinating history of the islands. The main areas of focus, which are addressed through a number of expositions are: natural history, human history and conservation for the future. You can also take one of the trails behind the center that lead to some great viewpoints of the ocean and volcanic rocks below. Depart from San Cristobal Airport.

**ECUADOR - EASTERN & WESTERN ISLANDS | ELITE**

**INCLUSIONS & DETAILS**

**Accommodation** Cabin on board ship

**INCLUSIONS**

Accommodation on board M/C Elite  
 Transfers in the Galapagos Islands  
 All meals  
 Water coffee and tea  
 Glass of house wine for dinners  
 Captain's Welcome & farewell cocktail  
 All excursions as per the itinerary\*  
 English-Speaking Naturalist guide  
 Snorkeling equipment  
 Wetsuits  
 Kayak equipment

**Inclusions**
